The Neuropathic Osteoarthropathic Foot, 23-25 June 2016, Rheine, Germany

Dear Sponsors

I am pleased to announce the 3rd International course on the Neuropathic Osteoarthropathic Foot (Charcot). The third course will be held in the beautiful Rheine, Germany in 23-25 June 2016.

The course will combine theory with practical training sessions held in the specialised Interdisciplinary Diabetic Foot Centre, Mathias-Spital.

The international course is based on the expertise gathered from more than 10 consecutive years of providing national courses on the Diabetic Foot. Based on an increasing interest and acknowledgement of the importance of proper treatment, we have decided to make the course available to an international audience. The course is in agreement with the [International Consensus on the Diabetic Foot & Practical Guidelines on the Management and Prevention of the Diabetic Foot](#) and is endorsed by the IWGDF (Int. Working Group of the Diabetic Foot).

The three day theoretical & practical course gives participants a thorough view of the different aspects of the diagnosis, treatment and management of the Charcot Foot. The course consists of theoretical lectures/debates conducted by international experts and practical sessions in small groups training the diagnostic and treatment skills necessary for the interdisciplinary treatment of Charcot patients.

In this sponsor information you will find information about the different opportunities for your company to be involved in the course on the Neuropathic Osteoarthropathic Foot.

Hopefully you will find the information you need. If you have any questions, please let us know.

We look forward to hearing from you.

Kind regards,

Prof. Maximilian Spraul
Diabetologist,
Mathias-Spital,

Dr. Armin Koller
Orthopedic Surgeon,
Mathias-Spital

Sponsorship opportunities

All sponsors will receive the highest recognition for their support of the Neuropathic Osteoarthropathic Foot. Sponsors will be listed on the course website immediately after confirmation of sponsorship.

A) Main Sponsorship 10.000 €

Entitlements:

- Profiling as main sponsor at course web site and in course material.
- Two free course participants (minimum 1 clinician)
- Right to enlist additional 2 participants for the course with a 20% reduction on the regular course fee (minimum 1 clinician)
- Evaluations and feedback from the course participants.
- One full page advert in course material.
- 1 roll-up and a small display of products/brochures at the course

B) General Sponsorship 5.000 €

Entitlements:

- Profiling as sponsor at course web site and in course material.
- Right to enlist 2 participants for the course with a 20% reduction on the regular course fee (minimum 1 clinician).
- Evaluations and feedback from the course participants.
- One half page advert in the course material.
- 1 roll-up and a small display of products/brochures at the course.

C) Focus Group 10.000 €

Duration 60 min

Focus groups give companies a chance to ask experts/key opinion leaders their opinion in a closed forum and are interesting for companies, who:

- Are about to launch a new product
- Are new to the European market and need feedback on their existing products
- Are established in general wound care but need more knowledge about DFU and Charcot Foot treatment.
- Would like to establish contact to key opinion leaders
- Are interested in feedback on products or clinical studies

A focus group at the Charcot Foot Course has the advantage that you do not need to fly in and accommodate a group of 5-10 persons, as all key opinion leaders are present at the course. This makes the focus group a cost effective tool to get feedback and promote your product towards key opinion leaders. Each focus group is designed and agreed individually.

Participants

The courses are open to anyone involved in the treatment or management of Neuropathic Osteoarthropathic Foot patients, but the primary target groups are:

Orthopedic Surgeons, Surgeons, Podiatrists and Diabetologists working in a multidisciplinary foot clinic. Specialised Nurses, Orthopedic Shoemakers, Orthotists and other health care professionals involved in the management of the Charcot Foot

Faculty

The faculty will be made up of international experts together with local specialists to ensure high quality in both the theoretical and practical sessions of the courses. The current faculty is listed on the course website www.charcotfootcourses.org

Course objectives

The objectives for the International Neuropathic Osteoarthropathic Foot Course are:
To increase the knowledge and practical training of state of the art methods in the diagnosis and treatment of the Charcot foot. To provide a forum for clinicians with experience in the treatment of diabetic feet to discuss and to practically train in depth different treatments modalities of the Neuropathic Foot. To enable a coordinated approach to a multidisciplinary treatment based on the recommendations of the International Consensus Document.

Course programme

The three day theoretical & practical course gives participants a thorough view of the different aspects of the diagnosis, treatment and management of the Charcot Foot.

Please see the updated programme at the course website: www.charcotfootcourses.org/course-program
